

Walkabouts Technology Specs and Configuration

The web-based Walkabouts platform is designed to operate easily and effectively using standard equipment available in virtually all classrooms. Necessary technology and equipment include an internet connection, computer with up-to-date browser and optional display or projector.

For optimal performance, please configure network settings and browsers in the following ways:

Firewalls

Open Port 80 to 184.107.233.50 and URL *.activedinc.com

Plug Ins

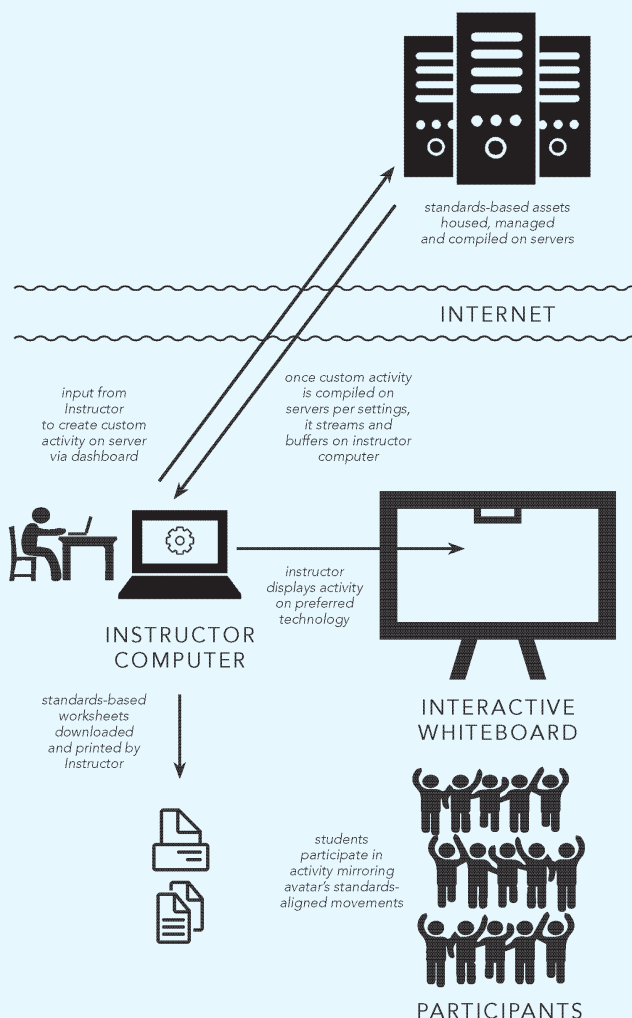

Flash 11+ is integrated within the platform and should be installed on each user's browser.

Browsers

Walkabouts play on various browsers but the system is optimized for the latest release of Google Chrome. Firefox is also supported. Internet Explorer, because of its slower speeds, is suggested as a last resort. *Flash-enabled browsers, such as Photon, are suggested for use on iOS devices such as iPhones and iPads.

Internet Speeds

Classroom internet speeds of at least 2 Mbps are recommended for efficient use.

Thanks for your interest in the Walkabouts multisensory learning platform!
